

DEAR CANVASSERS:

I care about how inequalities in our financial system affect people in Ireland and abroad. If I'm not at home when you call please know that your answers to these questions will influence my vote.

- **Break the chains of debt in the Global South.** Will you back a UN mechanism to resolve sovereign debt crises, so dodgy lending is dealt with democratically - and not by vultures?
- **The world's poorest shouldn't pay for a climate crisis they didn't cause.** Will you support grant-based climate finance for countries in the Global South, including debt restructuring and proper compensation for countries hit by natural disasters?
- **Stop the global race to the bottom on corporate taxation.** Will you support a global minimum effective corporate tax rate, public Country-By-Country-Reporting, a Common Consolidated Corporate Tax Base and other measures necessary to ensure multinational corporations pay their fair share in the countries where they make their profits?
